Scorpions of the Horn of Africa (Arachnida- Scorpiones). Part XXX 2.pdf

The Horn of Africa is a treasure chest filled with undescribed species. In the latest issue of Euscorpius, Frantisek Kovarik describes a new species in the genus *Barbaracurus* Kovarik, Lowe & Stahlavsky, 2018 (Buthidae) from Djibouti.

*Barbaracurus hofereki* Kovarik, 2024

# Abstract

*Barbaracurus hofereki* **sp. n.** from Djibouti is described and compared with other species of the genus. *B. hofereki* **sp. n.** is the only species of the genus with pedipalp movable finger with 8 rows of granules and pectinal tooth count 27–28 in female. Also, its pedipalp chela with very narrow manus (chela length/width ratio 6.07 in female), narrower than in all other African species of the genus. A map of the distribution of the genus in the Horn of Africa and the Arabian Peninsula is provided.
